

For each of the following recurrence relations:

- Compute $T(1)$, $T(2)$, $T(3)$ and $T(4)$
- Derive the closed form for $T(n)$
 1. $T(1) = 1$ $T(n) = 2 T(n-1)$ for $n > 1$
 2. $T(1) = 2$ $T(n) = T(n-1) + 5$ for $n > 1$
